COMMERCIAL WARRANTY: 2 Year On-site

Key Features

Inverter Technology

Their distribution is designed specifically to adapt to the interior of the device and allow the temperature in the food to increase consistently. Therefore, even delicate foods can be heated for longer periods under higher microwave power, saving time

Efficient performances

Speed convection with twin inverter technology ensures great results with minimum time

Fast and Efficient

Profit from higher customer satisfaction thanks to shorter waiting times. Utilising 3 technologies to create the optimum environment for consistent, fast and efficient food service

Rapid USB Transfer

Feel free to store your recipes on a USB stick and then simply transfer them to the SCV3 via the USB PORT. The oven can hold up to 100 recipes.

Energy Saving

Saves up to 5.5% on energy consumption (Results based on instant readings of power consumption from Panasonic internal tests. {UK, February 2025})

Culinary Variation

Offer your customers any number of dishes, snacks or sweets. With the different cooking methods and combination cooking, you can opt to serve a multitude of dishes: from breakfast delights through toasted sandwiches and hot pies

Ventless cooking operation

with the built-in catalytic convertor

Compact Design and Stackable

Thanks to its compact design, the unit is stackable - saving you a valuable space in your kitchen.

Technical Specifications

Power Source	230-240V, 50Hz Single Phase 16amp
Plug Type	20A plug
Required Power	15.8A 3800W
Combination Cooking	Combination microwave with grill, hot air, grill convection
Hot air	1465W (180 °C – 280 °C)
Quartz Grill	High - 1915W Low - 1150W (with 100% Fan Speed Control)
Preheat Adjustment Range	150 ° (Standby Preheat), 180 °C, 250 °C (intervals of 10 °C)
Memory Capacity	10 to 1,000
Door Opening	Drop down counter style door
No. of Magnetrons	2

Accessory Supplied

Hand Paddle, Ceramic Base Plate, Teflon Mat
